

ISR Physical Therapy

FCE Tip June, 2015

By Trevor D. Bardarson, PT, OCS

Experience Counts!

The physical therapists at ISR Physical Therapy have not only performed thousands of FCEs on a myriad of conditions, they have also performed onsite analysis of hundreds of job positions. The onsite analysis involves looking at the physical requirements of the job at the worksite and detailing it in a document called a functional job description. They have performed these assessments across the United States as well as overseas. Some of the clients they serve include Chevron Corporation, Transocean, Ingalls Shipyard, Blessey Marine, Entergy Corporation, Community Coffee, etc.

When you have an FCE performed at ISR Physical Therapy, not only do you get evaluators with many years of experience performing FCEs, you get evaluators who most likely have actually gone to the worksite of the job title in question and have a detailed understanding of the actual physical requirements and working conditions of that job. This combined knowledge allows the evaluators to make realistic determinations about an individual's ability to return to their position.
